

Education Aid

Summary

The Budget includes \$1,458.6 million for total FY 2024 aid for local school districts. This is \$52.6 million more than enacted for FY 2023. Funding includes \$1,148.2 million in direct distributions to local school districts, \$72.4 million in categorical funding, \$1.0 million in other aid for distribution by the Department of Elementary and Secondary Education, \$132.7 million for the state's contribution to teacher retirement, and \$104.2 million for school construction costs.

State Education Aid

*Davies begins appearing with education aid

The Governor's budget included several proposals to amend the calculation of funding formula aid to address 2022 Assembly requirements and ongoing demographic challenges facing districts. Absent these proposals, the funding formula calculation under current law would have been \$13.4 million less than enacted for FY 2023, with districts receiving \$29.2 million less and charter and state schools receiving \$15.8 million more.

The Assembly adopted several changes to the funding formula described in this report and reflected in the distribution tables at the end. It concurred with the Department and the Governor's proposal regarding poverty status calculations. It also added two kinds of new support to help districts manage changes in their demographics from one year to the next. The Governor had proposed a fund limited to enrollment shifts to charter schools. The fund replaces the school of choice density aid for traditional school districts with 5.0 percent or more students enrolled in schools of choice.

The Assembly also allowed for an alternate to the share ratio quadratic mean calculation to assist poorer districts. The current formula considers both the district's poverty concentration and its ability to generate revenues. The first component is the percent of children in poverty status. The second component is a measure of a community's per pupil wealth as compared to the per pupil wealth of the rest of the state. It uses property values adjusted for the median family income. This component is the share ratio formula

used prior to FY 2012. The Assembly change allows use of that value alone for districts with more than 50.0 percent poverty status if it is greater.

And finally, the Assembly added new reporting elements for the Department to submit as part of its annual budget submission. Beginning with the FY 2025 budget, it must report on local contributions to education aid and report compliance to each city or town school committee and city or town council, as well as different data on English language learners.

Poverty Data. The 2022 Assembly required the Department of Elementary and Secondary Education to develop measures for the collection of student poverty data that do not rely on school nutrition program participation. The new measurement would be implemented beginning with the calculation of FY 2024 funding formula aid. Under current law, “poverty status” for the purpose of calculating funding formula aid is defined as students whose family income is at or below 185.0 percent of the federal poverty level. The Department uses information from lunch forms as one measure for data on student poverty but there are differences in how districts collect this data or if they collect the data at all. Those districts that participate in the community eligibility school meals program use a separate income verification form. The state also ensures it counts students receiving Supplemental Nutrition Assistance Program benefits and other public assistance, since they are automatically eligible to participate in the school meal program.

The Department recommended the use of direct certifications, that is students categorically eligible for free lunch because they receive a means tested benefit, multiplied by a factor of 1.6. The use of that factor is intended to address shortcomings of the direct certification data, including that it relies on voluntary household participation and excludes some non-citizens. These data would also be used in the annual calculation of state share ratios. The Assembly adopted this proposal as recommended by the Department and the Governor but also required that beginning with the FY 2026 budget submission, it must reexamine options for changing the measure for identifying students in poverty using more available data options.

There were other recommendations requested by the Department and recommended by the Governor to assist with the impacts of the change proposed. Those, as well as the ones the Assembly adopted are shown in the table below.

Recommendations	Department	Governor	Assembly
Increase student success factor from 40% to 42%	√	√	
New factor for homeless students	√	√	
Poverty data stabilization fund	√		√
One-time supplemental transition fund	√	√	
New public schools of choice transition fund		√	
Enrollment loss transition fund			√
Share ratio alternate			√

Prior Changes. Since its inception, there have been various proposals to change the education funding formula. Based on the recommendations of a 2015 working group, the Assembly provided a category of aid for English language learners and three years of support for districts with a high incidence of students enrolled in charter or state schools. The 2018 Assembly also established a voluntary three-year pilot program to support school resource officers that ended in FY 2021. The 2021 Assembly enacted legislation to permanently provide transition support for districts with a concentration of students enrolled in charter or state schools.

The 2022 Assembly held districts harmless from the impacts of the coronavirus emergency on student enrollments for FY 2023 by allowing districts to use earlier enrollment data if it was higher with exceptions for transfers to other schools similar to a provision adopted for FY 2022. It also used prior year share ratio data. This was done to avoid the impact of pandemic-related issues that depressed data used to calculate

that metric, including student enrollment and the number of students in poverty, which caused the state share ratios for wealthier communities to grow as it fell for other communities because it is a relative measure.

Trends. The FY 2024 enacted budget includes \$1,148.2 million for direct aid to local school districts, an average annual increase of 4.8 percent from the first year of the formula. The funding formula costs are driven by enrollment, poverty measures, and the core instruction amount. Consistent with Rhode Island General Law, the core instruction amount is calculated using average expenditure and enrollment data from Rhode Island, Massachusetts, Connecticut, and New Hampshire from the National Center for Education Statistics. Specific expenditures used in the calculation are instruction and support services for students, general administration, school administration, and other support services.

Since FY 2012, the per pupil core instruction amount has increased by \$3,543, or 42.5 percent, which is an annual increase of 3.5 percent. Aid per student has increased by \$3,139, or 61.9 percent during that same period, which is an annual increase of 5.2 percent. The difference there can be attributed to more students in poverty.

The following table shows these changes, as well as changes to enrollment, students in poverty, and average state share ratio since the first year of the funding formula. The formula provides a 40.0 percent weight for each student living at or below 185.0 percent of the federal poverty level. The state share is a relative measure determined using the full value of local property, the median family income as determined by the last five years of census data, and enrollment data, including students in poverty using the new measure. Among all communities, the average state share ratio used for FY 2024 is 38.2 percent.

When multiplying the state share ratio for each community by the number of students used in the calculation, the average weighted state share ratio is 54.6 percent, somewhat higher than the 52.6 percent when the formula began. Table 2 at the end of this report shows the funding formula calculation by community for FY 2024.

	FY 2012	FY 2017	FY 2020	FY 2023 Enacted ¹	FY 2024 Enacted	Chg. to FY 2012	Chg. to FY 2012	% Average Annual Change

¹ Uses the greater of three years enrollment, adjusted for charter school growth and the FY 2022 state share ratio.

Education Aid by Component

The Budget includes \$1,458.6 million for FY 2024 education aid for distribution to districts, including Central Falls, Davies Career and Technical Center, charter schools and the Metropolitan Career and Technical School. This also includes teacher retirement and school housing aid as well as other formula aid for distribution by the Department. This is \$52.6 million more than enacted for FY 2023. The following table compares the FY 2024 enacted funding for the major components of education aid to the enacted FY 2023 budget and the Governor's recommendation. It is followed by an explanation of each of the items in the table.

Education Aid	FY 2023 Enacted	FY 2024 Governor	Change to Enacted	FY 2024 Enacted	Change to Enacted	Change to Governor
Operating Aid						
Local Districts	\$ 879,268,671	\$ 890,612,307	\$ 11,343,636	\$ 888,211,414	\$ 8,942,743	\$ (2,400,893)

*Budget is understated by \$230,353.

Operating Aid

Local Districts. The Budget includes \$888.2 million for formula aid to locally operated school districts. This is \$8.9 million more than enacted.

The final FY 2023 budget shifts \$1.2 million from charter school aid to local districts. The FY 2023 enacted budget assumed expansion at Youth Build that did not occur, and the final budget shifted funding back to Providence.

Central Falls. The Budget includes \$48.8 million for formula aid for the Central Falls School District. This is \$0.2 million less than FY 2023 enacted aid. Beginning with FY 2012, Central Falls is funded pursuant to the funding formula. The formula includes a discretionary stabilization fund to support the district until the city can begin paying its local share. This is the tenth year of stabilization funding and the Budget includes \$11.1 million, \$1.0 million more than enacted. Support also includes \$0.7 million from the enrollment loss transition fund described later in this report.

Metropolitan Career and Technical School. The Budget includes \$10.6 million for formula aid for the Metropolitan Career and Technical School. This is \$0.8 million more than enacted. The 2016 Assembly

enacted a stabilization fund for the state schools, which were previously fully state supported in order to mitigate some of the losses in funding from the implementation of the funding formula and recognize the additional costs associated with running a stand-alone school that offers both academic and career and technical education. This includes \$2.1 million in stabilization funding for the Met School, \$1.0 million more than enacted. Table 5 at the end of this report includes estimated enrollment for FY 2024.

Davies Career and Technical School. The Budget includes \$15.7 million from general revenues for formula aid to support the Davies Career and Technical School. This is \$0.9 million more than the FY 2023 enacted level. The 2016 Assembly enacted a stabilization fund for the state schools in order to mitigate some of the losses in funding from the implementation of the funding formula and recognize the additional costs associated with running a stand-alone school that offers both academic and career and technical education. The Budget includes \$6.5 million from stabilization funding for Davies, \$0.6 million more than enacted for FY 2023.

Davies was fully state supported until FY 2012, but is now funded like other districts with the state share being that of the sending district for each student plus the local contribution being the local per pupil cost of each sending district, which it must pay to the School. Davies' operating budget is submitted as part of the Department's budget and Davies' employees are still state employees. Table 5 at the end of this report includes estimated enrollment by sending district for FY 2024.

Charter Schools. The Budget includes \$153.9 million for formula aid to charter schools. This is \$16.2 million more than the FY 2023 enacted level based on the updated per pupil core instruction amount and projected growth for new and existing schools. Charter schools are funded pursuant to the education funding formula, like other districts. The state share is that of the sending district for each student and the local contribution is the local per pupil cost of each sending district, which it must pay to the school. Districts are billed quarterly for students attending charter and state schools.

The final FY 2023 budget shifts \$1.2 million from charter school aid to local districts. The FY 2023 enacted budget assumed expansion at Youth Build that did not occur, and the final budget shifted funding back to Providence. There is also \$0.3 million less from general revenues for education aid to charter schools based on a mid-year adjustment. State law allows for a mid-year aid adjustment if a charter school's October enrollment data in the current fiscal year shows a 10 percent or greater change from the prior October. Enrollment at Nuestro Mundo decreased 16.5 percent, and this adjustment reflects that.

Charter schools are public schools authorized by the state to operate independently from many state and local district rules and regulations. The 2010 Assembly increased the statewide total to no more than 35 charters; it had previously been no more than 20 charters serving no more than 4.0 percent of the state's school age population. At least half of the 35 total charters are reserved for charter school applications designed to increase the educational opportunities for at-risk pupils. Mayoral academies are charter schools and are included in the total. In FY 2023, there were 24 charter schools in Rhode Island, serving 11.1 percent of public school students. Table 5 at the end of this report includes enrollment used to calculate aid for FY 2024.

Urban Collaborative Accelerated Program. The Budget includes \$1.8 million for the Urban Collaborative Accelerated Program (UCAP) for FY 2024. The program which operates as an independent public school dedicated to reducing the dropout rates in Providence, Central Falls and Cranston has been funded through the formula since FY 2014. Table 5 at the end of this report includes enrollment by sending district used to calculate aid for FY 2024.

Youth Build Preparatory Academy. The Budget includes \$1.9 million for YouthBuild Preparatory Academy, which opened in the fall of 2022. The program which operates as an independent public school providing an alternative learning environment to students in Providence and Central Falls has been funded

through the formula since FY 2023. Table 5 at the end of this report includes enrollment by sending district used to calculate aid for FY 2024.

Group Homes. The Budget includes \$1.8 million for group home aid, based on 212 beds, which is 26 fewer than FY 2023. The current per bed amount is \$26,000 for the group home beds associated with Bradley Hospital's residential CRAFT program and \$17,000 for all other group home beds. In FY 2024, 12 communities will be hosting group homes. The law requires that the number of group home beds be deducted from enrollment data for the purpose of determining average daily membership. Instead of showing the impact of group home beds on funding formula aid, the impact is shown in group home aid. Increases in beds prior to December 31 of each year are paid as part of the supplemental budget for that year. The revised recommendation adds \$119,000 for seven new beds in FY 2023, including one in East Providence and six in Smithfield. Decreases in beds are not reflected until the budget year so any decreases in group home beds during FY 2023 would not be reflected until FY 2024. Table 3 at the end of the report shows the distribution by district.

Other Adjustments

Additional Appropriation. The 2022 Assembly held districts harmless from the impacts of enrollment declines for the purpose of funding formula education aid by using the highest enrollment of the last three years and maintaining the FY 2022 state share ratio for FY 2023. For some entities, the unaltered funding formula calculation would have produced more aid than the amended calculation. To lessen that impact, the FY 2023 enacted budget provides an additional appropriation equivalent to 20.0 percent of the difference in aid that would have been received under the unaltered calculation. The enacted budget includes \$0.7 million for the additional appropriation for FY 2023 only; impacted local education agencies include: Barrington, East Greenwich, Exeter, North Smithfield, Richmond, Smithfield, Beacon, Blackstone Academy, Village Green and Davies Career and Technical School.

For FY 2024, the Governor recommended \$8.5 million to provide a one-time supplemental transition fund to assist districts with aid declines from enrollment losses or other demographic changes. The Assembly did not adopt this proposal but did enact two kinds of new ongoing support to help districts manage changes in their demographics from one year to the next. These are described below.

Enrollment Transition Fund. The Budget includes \$20.0 million for a new category of aid that provides two years of funding to districts experiencing enrollment declines, including from students transferring to charter schools. This includes \$0.7 million for Central Falls. Districts will receive 40.0 percent of the state per-pupil funding lost in the first year and 25.0 percent in the second year. The Governor had proposed a similar fund limited to enrollment shifts to charter schools. The calculation and distribution of these funds are shown in Table 8 at the end of this report.

Poverty Loss Stabilization Fund. The Budget includes \$5.5 million for a new category of aid that will provide funding to help districts transition changes in state aid related to changes in wealth when the foundation formula aid produces less than the prior year and the decrease in the state share ratio is more than 2.0 percent. The fund will provide 50.0 percent of the difference that the formula aid calculation produces under the prior year's share ratio compared to the current year's share ratio. The calculation and distribution of these funds are shown in Table 9 at the end of this report.

COVID-19 Relief

Rhode Island was awarded \$599.9 million from the last two major federal stimulus acts to support elementary and secondary education of which at least 90.0 percent is for local education agencies. Total FY 2022 spending was \$94.7 million and the final FY 2023 budget includes \$308.9 million and the

remaining \$196.3 million is for FY 2024. The distribution by district is shown in Table 11 at the end of the report.

Elementary & Secondary School Emergency Relief Funds				
	FY 2022	FY 2023	FY 2024	
	Spent	Final	Enacted	Total
Aid to Districts	\$ 88.5	\$ 275.3	\$ 175.1	\$ 538.9
<i>State Schools</i>	0.1	4.2	4.4	8.7
<i>Central Falls</i>	0.0	10.0	10.9	20.9
<i>All Other Districts</i>	88.4	261.1	159.8	509.3
Discretionary Funds	6.2	33.6	21.2	61.0
Total	\$ 94.7	\$ 308.9	\$ 196.3	\$ 599.9
<i>\$ in millions; excludes CARES Act funding</i>				

Categorical Funding

For each category of aid, the Department of Elementary and Secondary Education prorates the funds available for distribution among those eligible school districts if the total approved costs for which districts are seeking reimbursement exceed the amount of funding appropriated in any fiscal year. There was an expectation that funding for these expenditures would grow annually as the funding formula was phased-in; however, funding has not increased annually. The Governor's out-year estimates assume these costs will remain constant for all categories except high cost special education and early childhood education. High cost special education would be maintained at full funding and early childhood would increase in FY 2025 to expand additional seats for FY 2026 but would remain flat after that.

High Cost Special Education. The funding formula allows for additional funding from the state for high cost special education students when those costs exceed five times the district's combined per pupil core instruction and student success factor amounts. The enacted budget lowers that threshold to costs that exceed four times the district's combined per pupil core instruction and student success factor amounts. The Budget includes \$15.0 million for FY 2024, \$10.5 million more than enacted. While there was an expectation that funding for these expenditures would grow annually as the funding formula was phased-in, aid remained flat at \$4.5 million for FY 2017 through FY 2023.

Career and Technical Programs. The funding formula allows for additional resources from the state to help meet the initial capital investment needs to transform existing or create new comprehensive career and technical education programs and career pathways in critical and emerging industries and to help offset the higher than average costs associated with maintaining the quality of highly specialized programs. The Department developed criteria for the purpose of allocating funds. The Budget includes \$4.5 million for FY 2024, the same amount as provided from FY 2017 through FY 2023. There was an expectation that funding for these expenditures would grow annually as the funding formula was phased-in; however, funding has only increased twice since it was first funded at \$3.0 million in FY 2013. The Governor's out-year estimates assume these costs will remain constant. These funds are not shown in the distribution tables at the end of this report.

Early Childhood Education. The funding formula allows for additional resources from the state to increase access to voluntary, free, high quality prekindergarten programs. Funds are distributed through a request for proposals process and are paid directly to early education programs. The Budget includes \$22.9 million from general revenues for FY 2024, \$8.0 million more than the FY 2023 enacted budget. All early childhood categorical funds were used as a match for a federal grant from FY 2016 through FY 2019, which allowed the Department to expand the number of prekindergarten classrooms from 17 in FY 2015 to 60 in FY 2018. This was first funded in FY 2013 at \$1.5 million. These funds are not shown in the distribution tables at the end of this report.

Beginning in FY 2020, the Department piloted a new “braided” formula model, whereby new classrooms were opened with some seats funded by federal Head Start grants and others by state funds. By leveraging Head Start funds, the program expanded to a total of 78 classrooms and 1,420 students in FY 2020. This is an increase of 340 seats over FY 2019, 223 of which were funded completely from general revenues and the remainder were funded from both state and federal sources. With the addition of new federal preschool development funds and federal funds authorized in response to the public health emergency, the program is supporting 2,370 students in 128 classrooms in FY 2023. This is an increase of 516 seats and 27 classrooms over FY 2021. Federal funds are available through FY 2023.

The 2022 Assembly required the Department to develop an expansion plan for the state prekindergarten program, including annual participation growth and associated costs, in order to achieve 5,000 seats over five years, including children ages three and four. The plan submitted on December 30, 2022, suggested building a pipeline of programs ready to become preschool providers so the state can open between 35 and 40 new classrooms a year from FY 2025 through FY 2028 to reach the 5,000 seats goal. The Department will oversee and administer the funding, in partnership with the Department of Human Services, to support quality investments. Contractors will be hired to assist programs that are interested in applying for a potential future classroom for FY 2025. Supports could include professional development, technical assistance, curriculum purchases, and educator preparation.

The Budget includes \$6.7 million to replace expiring federal funds to maintain 800 seats and \$1.3 million to prepare an additional 35 classrooms in FY 2025, consistent with the plan guidance. The out-year estimates included with the Governor’s recommended budget include \$31.5 million for FY 2025 and beyond, which includes \$6.7 million to maintain the backfill of federal funds and \$10.0 million for the expansion of classrooms. It assumes no growth past that despite the plan to double enrollment by FY 2028.

Non-Public School Transportation. The funding formula allows the state to provide resources to mitigate the excess costs associated with transporting students to out-of-district non-public schools. The state assumes the costs of non-public out-of-district transportation for those districts participating in the statewide transportation system. Prior to FY 2018, funding for transportation costs was allocated through a single category of aid. The Budget includes \$3.5 million for FY 2024, consistent with the enacted level. FY 2012 funding for this component of the original transportation fund was \$0.8 million.

Regional School District Transportation. The funding formula allows the state to provide resources to mitigate the excess costs associated with transporting students within regional school districts. The state shares in the costs associated with transporting students within regional school districts. The state and regional school districts equally share the student transportation cost, net any federal sources of revenue for these expenditures. Prior to FY 2018, funding for transportation costs was allocated through a single category of aid. The Budget includes \$7.2 million for FY 2024, \$1.4 million more than enacted to fully fund this aid. FY 2012 funding for this component of the original transportation fund was \$0.5 million.

English Language Learner Aid. The Budget includes \$19.4 million to support English language learners that are in the most intensive programs, \$14.4 million more than enacted. The funding is used on evidence-based programs proven to increase outcomes and are monitored by the Department of Elementary and Secondary Education. The calculation is 10.0 percent of the Core Instruction Amount, applied to students in the most intensive English learner programs, and then ratably reduced. The FY 2024 enacted budget increases that calculation to 15.0 percent and removes the allowance for a ratable reduction, requiring full funding. Funding for this category was first provided in FY 2017 for one year only; it was made permanent a year later.

School of Choice Density Aid. The 2017 Assembly enacted a three-year category of education aid to support districts which had at least 5.0 percent of their students enrolled in a charter or state school. Districts were provided \$175 per pupil in FY 2017, \$100 per pupil in FY 2018, and \$50 per pupil in FY 2019 for

every student sent to schools of choice. The 2021 Assembly amended this program to permanently provide transition aid to traditional school districts with at least 5.0 percent of resident students enrolled in schools of choice. For FY 2022, \$500 per pupil was provided for any new students that have enrolled in schools of choice since FY 2019, the last year for which there was support from this fund. The FY 2024 Budget discontinues this category of aid and in its place, there is a new enrollment transition fund described earlier in this report.

Set-Aside Funds

Textbook Loans. The Budget includes the enacted level of \$240,000 for the textbook loan program. The state currently reimburses districts for the cost of providing textbooks to non-public school students in the areas of English/language arts and history/social studies in kindergarten through 12th grade. The final FY 2023 budget includes \$31,585 based on actual expenses.

School Breakfast. The Budget includes \$270,000 for FY 2024 for the administrative cost reimbursement to districts for the school breakfast program, which is consistent with the FY 2023 enacted level. State law mandates that all public schools provide a breakfast program and costs, other than transportation, associated with this program in excess of federal money for the meals, shall be borne exclusively by the state, subject to appropriation. As in the lunch program, children from families with incomes at or below 130.0 percent of federal poverty are eligible for free meals, while those from families up to 185.0 percent of poverty are eligible for reduced-price meals.

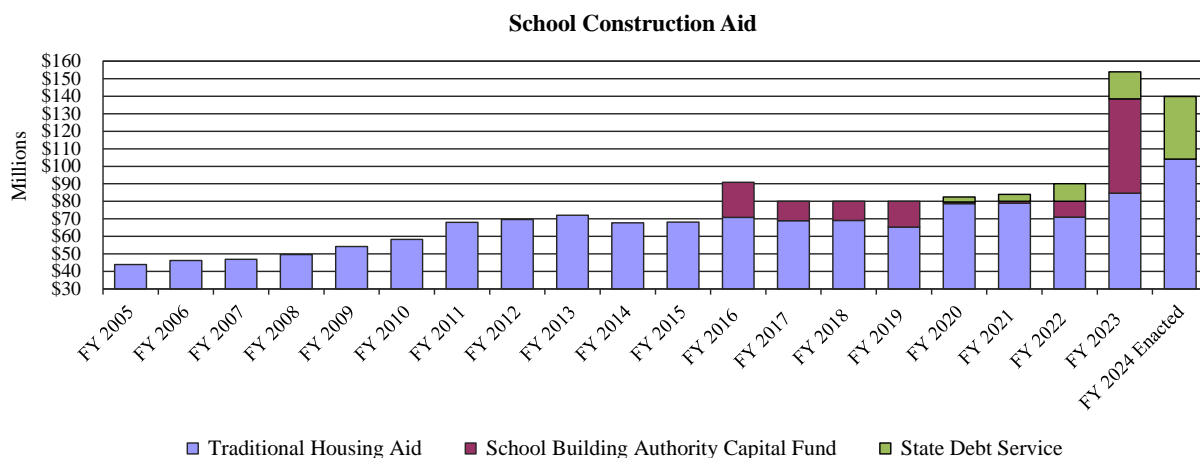

Recovery High School. The 2016 Assembly enacted legislation to provide \$500,000 for FY 2017 only to support the state's recovery high school. Recovery high schools are specifically designed for students recovering from a substance abuse disorder. The legislation also removed districts from the enrollment process and changed the local tuition payment from the local per pupil expenditures to the core instruction amount. The 2017 Assembly removed the one year funding limitation. The Budget includes \$500,000, consistent with the FY 2023 enacted budget.

Other Aid

Teacher Retirement. The Budget includes \$132.7 million to fund the state's 40.0 percent share of the employer contribution for teacher retirement, an increase of \$1.9 million or 1.4 percent more than the FY 2023 enacted budget. Prior to changes enacted in 2011, teachers had contributed 9.5 percent of their salaries; as of July 1, 2012, teachers contribute 8.75 percent. That rate is set in the General Laws. Employers contribute the difference between the teachers' share and the amount needed to support the system, as determined annually by the State Employees' Retirement System. For districts that choose not to participate in Social Security, there is an additional 4.0 percent contribution; 2.0 percent is paid by both the employee and the district. The state does not pay a share of this 2.0 percent.

School Construction Aid. The Budget includes \$104.2 million for construction aid to local districts. This includes funding for the traditional school housing aid program only, which reimburses school districts for a share of completed projects. The FY 2023 enacted budget includes one-time funding of \$50.0 million for the School Building Authority Capital Fund, which provides support for smaller projects that do not require both the full rehabilitation of a school and voter approval.

The 2011 Assembly instituted a three-year moratorium on the approval of new projects except for projects necessitated by health and safety reasons, effective July 1, 2011 through July 1, 2014. The 2014 Assembly extended the moratorium to May 1, 2015. During the moratorium, the Council on Elementary and Secondary Education approved \$162.0 million of health and safety projects.

The graph above shows school construction aid appropriations from FY 2005 through the FY 2024 enacted budget. Funding for the program more than doubled over ten years through FY 2002. It doubled again in the next ten-year period through FY 2012 with an average growth rate of 7.8 percent. Over the past ten years, from FY 2013 through FY 2022, the Council on Elementary and Secondary Education approved \$2,870.0 million of projects through the traditional school housing aid program. Additionally, it has approved 172 projects totaling \$62.9 million through the School Building Authority Capital Fund since FY 2016.

The 2018 Assembly enacted legislation to temporarily expand incentives used to enhance the school housing aid ratio in order to encourage new school construction and renovation projects, contingent upon approval of a bond referendum to be put before the voters on the November 2018 ballot to help fund the work. Districts are eligible for share ratio increases of up to 20.0 percent for projects that meet the following incentives.

Temporary Incentive	Share Ratio Increase
1 Health & safety	5%
2 Educational enhancements (includes early education & CTE)	5%
3 Replace facility with a facilities condition index of 65%+	5%
4 Increase functional utilization of a facility from <60% to 80%	5%
5 Decrease facility functional utilization from >120% to between 85% & 105%	5%
6 Consolidate 2+ buildings	5%

While the maximum state share increase is 20.0 percent, a district's local share cannot decrease by more than half of its regular share regardless of the incentives earned, nor can a district's state share increase by more than half of its regular share. Also, the third incentive noted in the table cannot be combined with the fourth or fifth incentive. The 2023 Assembly removed the second limitation for the remainder of the incentive period, which would allow minimum share communities the potential to earn an additional 2.5 percent.

Projects approved between May 1, 2015 and January 1, 2018 are eligible for state share increases of up to 20.0 percent so long as commissioning agents and Owners Program Managers are utilized; those projects that do not are eligible for a 5.0 percent increase. Each incentive requires spending 25.0 percent of project costs or \$500,000 on related items. The original legislation required that projects begin by either December 30, 2022 or 2023 and be completed within five years to receive the temporary incentives. The 2022 Assembly extended two incentives by one year and aligned all temporary incentives with the December 30,

2023 start deadline; it maintained the five-year completion window. The 2023 Assembly extended all incentives by six months to June 30, 2024, and maintained the five-year completion window.

The 2018 legislation established a permanent incentive for projects that address school safety and established minimum maintenance spending requirements. Districts are required to meet one of three options to meet the requirements. Maintenance spending may either equal \$3 per square foot of school building space, 3.0 percent of a building's replacement value, or 3.0 percent of the school's operating budget; the latter two options are phased-in over four years. It also includes additional requirements and oversight throughout projects, which are intended to control project costs, ensure building systems operate correctly, and ensure that projects are executed properly from design through construction. Owners Program Managers and commissioning agents are required for projects exceeding \$1.5 million, and state prequalification of prime contractors is required for all projects exceeding \$10.0 million. Architects and engineers are also required to go through a prequalification process. A list of prequalified contractors, architects and engineers is required to be publically posted with all other program information. While this does not appear to be available on the Department's website, the information is available through the Department of Administration's Division of Purchases.

Debt Financing. The capital plan includes \$500.0 million of general obligation bonds, which were approved by the voters on the November 2018 and November 2022 ballots to provide funding to local education agencies on a pay-as-you-go basis for school construction projects. The capital budget assumes issuance of \$25.0 million for FY 2024, \$75.0 million for FY 2025, \$100.0 million for FY 2026, \$46.2 million for FY 2027, and \$3.8 million for FY 2028 from the November 2022 bond. The original bond is programmed at \$121.7 million in prior spending, \$65.5 million for FY 2023, and \$62.8 million for FY 2024. The budget includes over \$15 million for the debt service on the \$121.7 million issued so far and the \$65.5 million expected to be issued this year.

The Budget also includes \$13.4 million for the first year of debt service for a new high school for Central Falls which was authorized in 2021 to be finance directly by the state. The project cost is \$144.0 million, with a state share of \$138.2 million. The Budget includes \$0.3 million in revenues from Central Falls to reimburse the state for its share of the debt service for FY 2024.

Approvals. Between FY 2019 and FY 2021, the Council on Elementary and Secondary Education approved \$1,156.1 million for projects across 17 districts. The Council approved \$864.0 million in 2022 and \$586.4 in FY 2023, with \$1,145.0 million in projects expected to be approved during FY 2024. The projected application surge is anticipated as a result of the pending expiration of the temporary incentives.

The following table includes projects approved from FY 2015 through May 2023, as well as projected approvals for FY 2024. This reflects the state share of the total project costs as presented to the Council. It should be noted that these amounts exclude the impact of the new incentives and, pending calculation and confirmation of those final values, the actual state share of projects will likely be higher.

Approvals	Total Project Costs	Base State Share w/o Incentives	Upfront Bond Reimbursement
FY 2015 to FY 2018	\$ 538,462,880	\$ 357,460,960	\$ 39,901,249

\$ in millions; excludes value of potential incentive points.

The out-year estimates included with the Governor's recommended budget are based on December 2021 projections by the School Building Authority, adjusted for the impact from a second \$250.0 million school construction bond and do not reflect the most recent update from the Authority in December 2022. These estimates will change significantly based on actual project activity and do not include debt service for the state bonds or Central Falls direct debt, which is shown in the Department of Administration's budget.

	Out-Year Estimates

\$ in millions

Calculation and Distribution Tables

The 12 tables on the following pages include the calculation and distribution of the FY 2024 enacted education aid to districts, charter and state schools. Tables 1A and 1B show the total funding and Tables 2 through 9 illustrate different components of the funding formula. Table 10 has education aid to districts for FY 2018 through FY 2022 for comparison purposes. Table 11 shows the distribution of federal stimulus funds authorized under the Consolidated Appropriations Act of 2021 and the American Rescue Plan Act.

Table 1A: Total Education Aid for Districts for FY 2024

Table 8: Enrollment Transition Fund for FY 2024

Table 9: Poverty Stabilization Fund for FY 2024

Table 10: Education Aid for FY 2018-FY 2022

Table 11: Education Federal Stimulus Funds

Table 1A: Total Education Aid for Districts for FY 2024

A. Column **A** is the FY 2024 enacted formula aid for districts. It is based on March 15, 2023 student enrollment data adjusted for charter school growth. As proposed by the Governor and directed by the 2022 Assembly, it changes how poverty status is measured. It uses direct certifications, that is students categorically eligible for free lunch because they receive a means tested benefit, multiplied by a factor of 1.6, intended to address shortcomings of the direct certification data including that it relies on voluntary household participation and excludes some non-citizens. These data are also used in the annual calculation of state share ratios.

B. Column **B** shows the amount of group home aid for FY 2024. Group home aid is paid through the funding formula pursuant to current law.

C. The formula allows for additional resources from the state for high-cost special education students, high-cost career and technical programs, early childhood education programs, transportation costs and a limited two-year bonus for regionalized districts. The distribution from high-cost special education, transportation, English language learners, homeless students and public schools of choice transition funds is shown in column **C**.

D. Column **D** shows the new enrollment transition fund. This fund will provide two years of support to districts experiencing enrollment losses. Districts will receive 40.0 percent of the state per-pupil funding lost in the first year and 25.0 percent in the second year. The calculation is described in Table 8.

E. Column **E** shows the new poverty loss stabilization fund. The fund will provide 50.0 percent of the difference that the formula aid calculation produces under the prior year's share ratio compared to the current year's share ratio if the foundation formula aid calculation produces less than it would using the prior year's state share ratio and the decrease in the state share ratio is greater than 2.0 percent. The calculation is described in Table 9.

F. Column **F** shows the total FY 2024 enacted aid.

G. Column **G** shows the Governor's total FY 2024 recommended aid.

H. Column **H** is the difference between the FY 2024 enacted budget showed in column **F** and the Governor's FY 2024 recommended budget shown in column **G**.

Table 1B: Total Education Aid for Charter and State Schools for FY 2024

A. Column **A** is the FY 2023 formula aid enacted by the 2022 Assembly.

B. Column **B** is the final FY 2023 formula aid. It shifts \$1.2 million from charter school aid to local districts. The FY 2023 enacted budget assumed expansion at Youth Build that did not occur, and the final budget shifted funding back to Providence. There is also \$0.3 million less from general revenues for education aid to charter schools based on a mid-year adjustment. State law allows for a mid-year aid adjustment if a charter school's October enrollment data in the current fiscal year shows a 10 percent or greater change from the prior October. Enrollment at Nuestro Mundo decreased by 16.5 percent, and this adjustment reflects that.

C. Column **C** shows the FY 2024 enacted formula aid. It is based on March 15, 2023 student enrollment data adjusted for charter school growth. As proposed by the Governor and directed by the 2022 Assembly, it changes how poverty status is measured. It uses direct certifications, that is students categorically eligible for free lunch because they receive a means tested benefit, multiplied by a factor of 1.6, intended to address shortcomings of the direct certification data including that it relies on voluntary household participation and excludes some non-citizens. These data are also used in the annual calculation of state share ratios.

D. The funding formula provides support for English language learners that are in the most intensive programs. The calculation is 10.0 percent of the Core Instruction Amount, applied to students in the most intensive English learner programs, and then ratably reduced. The enacted budget increases that calculation to 15.0 percent and requires full funding. The distribution is shown in column **D**.

E. Column **E** shows the amount of high cost special education funding. The funding formula allows for additional funding from the state for high cost special education students when those costs exceed five times the district's combined per pupil core instruction and student success factor amounts. The enacted budget lowers that threshold to costs that exceed four times the district's combined per pupil core instruction and student success factor amounts.

F. Column **F** shows the total general revenue education aid enacted for FY 2024.

G. Column **G** is the difference between the FY 2024 enacted aid shown in column **F** and the FY 2023 enacted aid shown in column **A**.

H. Column **H** shows the Governor's original recommendation for FY 2024.

I. Column **I** is the difference between the FY 2024 enacted aid shown in column **F** and the Governor's original recommendation for FY 2024 shown in column **H**.

Table 2: Calculation of Funding Formula for FY 2024

A. The FY 2024 student counts are shown in column **A** based on the resident average daily membership as of March 15, 2023, adjusted for new and expanding charter schools. Average daily membership calculates an average of the number of days all students are formally members of a district and/or a school per year.

B. Column **B** includes the number of students in prekindergarten through 12th grade that are in “poverty status,” which is defined as a child whose family income is at or below 185.0 percent of federal poverty guidelines. The 2022 Assembly enacted legislation requiring the Department to develop measures for the collection of student poverty data that do not rely on school nutrition program participation. The Budget assumes use of direct certifications, or students categorically eligible for free and reduced-price lunch because they receive a means tested benefit, multiplied by a factor of 1.6 as recommended by the Department and the Governor.

C. Column **C** includes the percent of students that are in poverty status. This is column **B** divided by column **A**.

D. Column **D** is the core instruction funding, which is the student count in column **A** times the core instruction per pupil amount of \$11,876. Current law requires the core instruction per pupil amount to be updated annually.

E. Column **E** includes the student success factor funding, which is a single poverty weight as a proxy for student supports and is 40.0 percent times the number of students in prekindergarten through 12th grade that are in poverty status in column **C** times the core instruction amount.

F. The total foundation amount in column **F** is the sum of the core instruction amount in column **D** plus the student success factor funding in column **E**.

G. Column **G** is the state share ratio; the calculation is described in Table 4.

H. Column **H** includes the state foundation aid under the funding formula. It is the total foundation amount in column **F** times the state share ratio in column **G**.

I. Column **I** is the FY 2023 enacted formula aid.

J. Column **J** is the difference between the FY 2024 enacted formula aid shown in column **H** and the FY 2023 enacted amount of formula aid in column **I**.

K. Column **K** is the difference between the FY 2024 enacted formula aid shown in column **H** and the Governor’s original recommendation for FY 2024.

Table 3: Group Home Aid for FY 2024

The distribution of group home aid includes \$17,000 per bed with the exception of \$26,000 per bed for the group home beds associated with Bradley Hospital's residential CRAFT program. The district's total enrollment is then reduced by the number of group home beds. The total amount of funding is reduced by the value of that district's state share of core instruction and student success factor amounts times the number of group home beds. The impact is shown as a reduction to group home aid.

A. Column **A** is the number of beds eligible for group home aid. The Department of Children, Youth and Families identified 212 beds eligible for aid as of December 31, 2022.

B. Column **B** is the total cost of beds identified in column **A**. It reflects \$17,000 per bed with the exception of \$26,000 per CRAFT bed.

C. Column **C** shows the cost of beds in column **B** reduced by the value of districts' state share of core instruction and student success factor amounts times the number of group home beds.

D. Column **D** shows the enacted FY 2024 group home aid, which is consistent with the Governor's recommendation.

E. Column **E** shows the FY 2023 enacted group home aid.

F. Column **F** shows the difference in group home aid from the FY 2024 enacted appropriation shown in column **D** and the FY 2023 enacted aid shown in column **E**.

Table 4: Calculation of State Share Ratio

The table shows the calculation of each community's state share ratio. The share ratio formula considers the district's ability to generate revenues and its poverty concentration.

A. The assessed value of real and tangible personal property for each city and town as of December 31 of the third preceding calendar year in accordance with Rhode Island General Law, Section 16-7-21. The December 31, 2019 value is used for FY 2024 calculations. This is certified annually by the Department of Revenue's Division of Municipal Finance, based on local sales data and appraisals. This is shown in column **A**.

B. The Division adjusts for differences in local assessment rates to allow the reporting of figures comparable on a statewide basis, resulting in the equalized weighted assessed valuation (EWAV). The valuations are then adjusted by the ratio that the community's median family income bears to the statewide median family income, as reported in the most recent federal census data. Use of both the property value and the median family income is an attempt to compensate for districts that have significant disparity between median family income and the full value of property. Once community wealth is determined, it is divided by pupil counts to calculate the per pupil wealth for each community compared to the per pupil wealth for the state as a whole. This is shown in column **B**.

C. The FY 2024 student counts are shown in column **C** based on the resident average daily membership as of June 30, 2022. This represents the average of the number of days all students are formally members of a district and/or a school per year.

D. The resulting relative per pupil community wealth is then multiplied by 0.475 and subtracted from 1.0, yielding the district's share ratio. The result is multiplied by 100 to convert this share ratio to a percentage, which is shown in Column **D**.

E. Column **E** includes the percentage of students in poverty status in prekindergarten through 6th grade as of June 2022. Under current law, "poverty status" for the purpose of calculating funding formula aid is defined as students whose family income is at or below 185.0 percent of the federal poverty level. This is measured by direct certifications, or students categorically eligible for free and reduced-price lunch because they receive a means tested benefit, multiplied by a factor of 1.6.

F. The calculation in column **F** is the square root of the sum of the state share ratio for the community calculation in column **D** squared plus the district's percentage of students in poverty status in grades prekindergarten through sixth in column **E** squared, divided by two.

$$\text{State Share Ratio (SSR)} = \sqrt{\frac{\text{SSRC}^2 + \%PKDirect Cert^2}{2}}$$

G. Column **G** shows the final state share ratio. The Assembly adopted a change to allow districts with more than 50.0 percent poverty status to use the state share ratio for the community calculation alone, if it is greater.

H. Column **H** shows the state share ratio used in the FY 2023 enacted budget. It uses property valuations as of December 31, 2017 and student counts as of June 30, 2020, the same as used for FY 2022.

I. Column **I** shows the difference between the share ratios for FY 2024 and FY 2023.

J. Column **J** is the percent change between the share ratios for FY 2024 and FY 2023 and is used to determine eligibility for the new poverty loss stabilization fund. That calculation is shown in Table 9.

Table 8: Enrollment Transition Fund for FY 2024

A. Column **A** shows the FY 2023 enacted student counts based on the resident average daily membership in March 2020, 2021, or 2022, whichever was greater.

B. The FY 2024 student counts are shown in column **B** based on the resident average daily membership as of March 15, 2023.

C. Column **C** is the difference between the FY 2024 student counts shown column **B** and the FY 2023 student counts shown in column **A**.

D. Column **D** is the effective state share per pupil. It is the amount of FY 2024 enacted formula aid shown in Column **H** in Table 2 divided by the FY 2024 student counts shown in column **B**.

E. Column **E** shows the year one aid included in FY 2024. The calculation is 40.0 percent of the loss of students shown in column **C** times the effective state share per pupil shown in column **D**.

F. Column **F** shows the year two aid that will be paid in FY 2025. It is 25.0 percent of the loss of students shown in column **C** times the effective state share per pupil shown in column **D**.

Table 9: Poverty Stabilization Fund for FY 2024

- A.** Column **A** is the FY 2024 enacted formula aid shown in column **H** in Table 2.
- B.** Column **B** is the calculation of formula aid using FY 2024 enrollment, student poverty and core instruction amount but the FY 2023 share ratio instead of the FY 2024 share ratio.
- C.** Column **C** is the difference between the FY 2024 enacted formula aid in column **A** and the FY 2024 calculation using the FY 2023 share ratio in column **B**.
- D.** Column **D** is the percent change between the share ratio for FY 2024 and the FY 2023 enacted share ratio. It is column **J** on Table 4.
- E.** Column **E** is the distribution of the new poverty loss stabilization fund. When the foundation formula aid produces less than the prior year as shown in column **C** and the decrease in the state share ratio is more than 2.0 percent as shown in column **D**, the payment is 50.0 percent of the difference in formula aid shown in column **C**.
